

Amara Okafor

Senior Full-Stack Engineer | React, Node.js, PostgreSQL | Remote-first teams

Lagos, Nigeria | amara.okafor@example.com

PROFILE

I lead full-stack delivery from schema design through accessible interfaces, with a focus on dependable systems and pragmatic mentoring. Most recently at Blue Harbor Software, I led a cross-functional product squad and reduced release lead time while scaling a high-traffic customer workflow.

EXPERIENCE

Senior Software Engineer - Blue Harbor Software - January 2021 to Present

Led a cross-functional product squad and reduced release lead time while scaling a high-traffic customer workflow.

Full-Stack Engineer - NimbusCart - May 2017 to January 2021

Delivered customer-facing improvements, strengthened team practices, and took ownership of increasingly complex work.

SKILLS

React, TypeScript, Node.js, PostgreSQL, GraphQL, AWS

EDUCATION

BSc Computer Science - University of Lagos - September 2012 to June 2016; Professional Certificate in Leadership and Systems Design - Open Learning Institute - February 2024 to October 2024
